Reviewer's report

Title: "Principal Component Analysis of the Relationship Between Pelvic Inclination and Lumbar Lordosis"

Version: 0 Date: 01 Aug 2018

Reviewer: Toru Maruyama

Reviewer's report:

1 My greatest concern is the definition of pelvic inclination.

   On the line 52, the authors referred Legoye's article, that described "Pelvic Incidence".

   On the line 199, the authors described, Pelvic inclination (i.e. Pelvic Tilt).

   Both Pelvic Incidence and Pelvic Tilt may be difficult to measure by surface topography.

   Please clarify the definition of the pelvic inclination and how to measure it on the surface topography image.

2 On the line 83, 119, and 86, Please clarify the patients' demographic data, such as age, gender, diagnosis and the treatment they underwent.

   Please describe how to do the manual therapy and corrective exercise in details.

3 Why did the treatment finished at 12 weeks.
