Reviewer’s report

Title: Primary cutaneous apocrine gland carcinoma from areolar tissue in male patient with gynecomastia: a case report.

Version: 1 Date: 25 May 2015

Reviewer: Hasan Ekim

Reviewer’s report:

Minor essential revisions: Was there any relationship between PCAGC and gynecomastia.
Did gynecomastia shrink after surgery or did it remain the same size.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published
