Reviewer's report

Title: Early and Midterm Outcomes of the VSSR procedure with De Paulis valsalva graft: A Chinese single-Center Experience in 38 patients

Version: 5 Date: 4 April 2015

Reviewer: Ruggero De Paulis

Reviewer's report:

No major compulsory revision.

Minor revision on the figures have been completed. Quality of figures should be improved.

The key limitations of the study in the last page are confusing and should be erased.

I appreciate the effort in language editing but I would suggest an english mother language to review the final version.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published.

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:

Already stated in my previous review.
