Reviewer's report

Title: Early and Midterm Outcomes of the VSSR procedure with De Paulis valsalva graft: A Chinese single-Center Experience in 38 patients

Version: 6  Date: 17 July 2015

Reviewer: Ruggero De Paulis

Reviewer's report:

The authors have considerably improved the english language from the previous version.

In the results they report the freedom from re-operation and the freedom from valve replacement. There were cases re-operated without an aortic valve replacement? Second, what freedom from important events is standing for? The authors should specify what events they are referring.

Finally, in the freedom from AI are also included all patients re-operated for aortic insufficiency?

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:

Yes, as stated in my previous review
