Title: Aortic Root Remodeling And External Aortic Annuloplasty To Treat Sinus Of Valsalva Aneurysm In A Patient With Complete Situs Inversus

Version: 7 Date: 5 April 2015

Reviewer: Yutaka Okita

Reviewer's report:

This is case report of isolated aneurysm of the sinus Valsalva in a patient with situs inversus. I do not think that this paper can be accepted because the situs inversus is already well-known. Also, the remodeling procedure with Lansac ring is well-known. There is no new information.
