Reviewer's report

Title: Collaborative Treatment of Huge Intrathoracic Meningoceles Associated with Neurofibromatosis Type 1: a case report

Version: 7 Date: 23 August 2015

Reviewer: Seiichi Kakegawa

Reviewer's report:

The authors explained the purpose and the method of spinal fluid puncture after surgery and I agree about it.

Level of interest: An article of importance in its field

Quality of written English: Acceptable
