Reviewer’s report

Title: Pre-Transplant Depression as a Predictor of Adherence and Morbidities after Orthotopic Heart Transplantation

Version: 0 Date: 14 Jun 2017

Reviewer: Matthias Siepe

Reviewer's report:

This is a well conducted and nicely presented study.

The main limitation is the low number of depressed patients studied (n=9).

Otherwise the results are clear and meaningful and presented in a valid manner.

Level of interest
Please indicate how interesting you found the manuscript:

An article of importance in its field

Quality of written English
Please indicate the quality of language in the manuscript:

Needs some language corrections before being published
Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.
