Reviewer’s report

Title: Intralobar Pulmonary Sequestration Displayed as Localized Emphysema on Computed Tomography Image

Version: 0 Date: 04 Jun 2017

Reviewer: Long-Qi Chen

Reviewer’s report:

The authors presented an interesting image on a rare case of pulmonary sequestration. It is well written and thoroughly discussed. I think this work is of clinically significance and will provide useful information to other practitioners. I recommend an acceptance with minor revision —

In conclusion section, 'Although the employment of coil embolization as a promising technique has been reported, some authors, such as Kohei Ando (5)' should appear in discussion section, not in conclusion.
