Title: Sternal reconstruction after poststernotomy mediastinitis

Version: 0 Date: 15 Jul 2017

Reviewer: Vinicius Nina

Reviewer's report:

Dear Author

Your manuscript is a traditional review of literature aiming to provide a broad overview of sternal wound reconstruction after mediastinitis; however, all topics are interpreted unsystematically with subjective summaries of findings of previous publications. There is no clear methodological approach and evidence-based criteria for selecting papers that were used to compose it.

Sincerely,

Reviewer
