Reviewer’s report

Title: Visceral subpleural hematoma of the left diaphragmatic surface following left upper division segmentectomy

Version: 0 Date: 07 Aug 2017

Reviewer: Paola Ciriaco

Reviewer's report:

This is a well written case report about an unusual complication that might occur in Thoracic Surgery. My question is if this hematoma might have been caused by a laceration perhaps sectioning the inferior pulmonary ligament. Would you please clarify if the section of inferior pulmonary ligament could have been one the cause of the hematoma.
