Reviewer’s report

Title: OSTEONESENOSIS IMPERFECTA, INTERNAL MAMMARY ARTERY GRAFT & NITINOL CLIPS

Version: 0 Date: 03 Nov 2017

Reviewer: Yuji Hiramatsu

Reviewer's report:

The manuscript is well written and puts some incremental knowledge in this field. I would ask additional comments and description regarding the fragility of ascending aorta and coronary arteries when authors performed aortic cannulation and coronary anastomoses. Aortic fragility often makes hemostasis difficult at the aortotomy site. Coronary angiogram is not necessary.

Level of interest
Please indicate how interesting you found the manuscript:

An article of importance in its field

Quality of written English
