Reviewer’s report

Title: Does Full sternotomy have more significant impact than the cardiopulmonary bypass time in patients of mitral valve Surgery?

Version: 0 Date: 19 Dec 2017

Reviewer: Eduardo Rocha

Reviewer's report:

The paper is very interesting. The real importance of the subject is: which factor has a bigger impact in morbity and mortality. What kind of surgery is less invasive in fact. The aggression of the wound is less invasive than a bigger by-pass. I think every surgeon will be interested with this paper.
