Reviewer’s report

Title: Carbon Dioxide De-airing in Minimal Invasive Cardiac Surgery, a new effective device

Version: 0 Date: 23 Oct 2018

Reviewer: Gianni Angelini

Reviewer's report:

An interesting and well conducted study which is trying to make more than what the data shows in term of conclusion.

It would be interesting to see a figure of the devise.

It would also be good to have a critical view in the discussion on the use of CO2 since there is no hard evidence at all in the literature that it reduces air embolisation.

Otherwise of interest to the readership.
