Reviewer’s report

Title: Tracheal suspension with autogenous rib cartilage in a patient with severe tracheomalacia

Version: 0 Date: 02 Oct 2018

Reviewer: Reda Al-Refaie

Reviewer's report:

It is good case report with the following comments:

1. Abstract: line 10 and 15: the authors 2 different units (4.46mm, 0.446cm) for the same thing.

2. The last paragraph in the back ground has no reference.

3. Page 5, line 23: (local pneumonia) what does it mean as it is not the proper medical term.

4. The authors required to write more details regarding the surgical procedure.

5. The operative picture is not clear with no identifiable structures.

I think it could be of interest among the experts of the field.
