Reviewer’s report

Title: Successful en bloc endoscopic full-thickness resection of a giant cervical esophageal leiomyoma originating from muscularis propria

Version: 1 Date: 07 Oct 2018

Reviewer: Christophoros Foroulis

Reviewer's report:

The authors report a case of extrapulmonary sequestration without communication to the tracheobronchial tree. They could submit a better image of the feeding vessel coming from internal thoracic artery (if available).

The thoracoscopic images are quite good, however a short video demonstrating the sequestration could be more informative for the reader. References are quite old and the references list could be refreshed.
