Reviewer’s report

Title: Wine cup stoma anastomosis after extended sleeve lobectomy for central-type squamous cell lung cancer: a case report

Version: 0 Date: 19 Jan 2019

Reviewer: Charilaos Panagiotis Koutsogiannis

Reviewer’s report:

The authors reported an interesting case of the management of a central-type squamous cell lung cancer. They have avoided pneumonectomy and successfully performed only extensive sleeve lower lobectomy with "wine cup stoma". This case might be of interest to readers because of its rarity.

I congratulate them for their paper and their overall operation and management. Their text is well written. The "case report" is well described. The topic is enough and well discussed. Generally, my opinion about this case report is positive.
