Title: Influence of Mitroflow Bioprosthesis Structural Valve Deterioration on Cardiac Morbidity

Reviewer’s report:

Thank you very much for giving me the opportunity to review the manuscript. Because the mitroflow bioprosthesis is not used in my country. So I am not very clear about the effect of this bio-valve, and the understanding of its biological durability comes from your follow-up data. I have some suggestions as follows.

1. Five-year follow-up data suggesting a significant increase in heart failure and infective endocarditis due to bioproliferative failure. Your heart center also uses other company bio-valves. Why not compare between different bio-valves?

2. Compare the differences in cancer between the three groups during follow-up. What is your main purpose?
