Reviewer’s report

Title: Influence of Mitroflow Bioprosthesis Structural Valve Deterioration on Cardiac Morbidity

Version: 0 Date: 25 Jan 2019

Reviewer: Tetsuro Uchida

Reviewer’s report:

This is an interesting article that highlights a structural valve deterioration of Mitroflow bioprosthesis and cardiac morbidity. I would recommend acceptance with minor revisions.

My recommendation to the authors relates to the relationship between the high incidence of Mitroflow bioprosthesis structural valve deterioration and its structural properties.

If there are any specific reason that would explain its pathogenesis, that would be helpful.

It would be helpful for readers to insert a small paragraph describing the pathogenesis of bioprosthetic structural valve deterioration in the Discussion section.
