Title: Sternal resection and reconstruction for metastasis due to breast cancer: The Marlex sandwich technique and implantation of a pedicled latissimus dorsi musculocutaneous flap

Version: 0 Date: 17 Feb 2019

Reviewer: Vivek Srivastava

Reviewer's report:

Dear Authors

I read with interest your case report detailing management of a delayed sternal metastasis from a treated breast cancer.

I found it to be well written. You have reported success with your approach and the picture with the final surgical result is indeed impressive.

Please could you add a comment about your follow-up plans.

1. what were the oncology MDT recommendations with regard to adjuvant chemotherapy/radiotherapy

2. duration of follow-up with modality planned - CT / PET CT etc.

Many thanks for your submission
