Reviewer’s report

Title: Giant left ventricular pseudoaneurysm: a rare acute complication of radiofrequency catheter ablation for premature ventricular contraction

Version: 0 Date: 02 Jun 2019

Reviewer: Charilaos Panagiotis Koutsogiannidis

Reviewer’s report:

The authors reported an interesting case of the management of a huge pseudoaneurysm following RF catheter ablation for premature ventricular contraction. This is a very rare complication after this kind of procedure. Its management was surgical and that was prompt and successful. This case report might be of interest to readers because of its rarity.

I congratulate them for their paper and their overall operation and management. Their text is well written. The "case report" is well described. The topic is enough and well discussed.
