Reviewer's report

Title: Robotic-assisted simultaneous resection of a left-sided thymic neoplasm and a right-sided lower thoracic paravertebral neoplasm via the same ports and two docking steps: A case report

Version: 0 Date: 05 Jul 2019

Reviewer: Stefano Bongiolatti

Reviewer's report:

This paper describes the resection of two mediastinal lesions with the Davinci robotic platform. In my opinion the paper has a limited interest because the advantages and the approaches of the robot-assisted surgery are well known. The authors must declare the version of the platform (DaVinci Si, I suppose).

Level of interest
Please indicate how interesting you found the manuscript:

An article of limited interest
