Reviewer’s report

Title: Gingival metastasis of a mediastinal pulmonary sarcomatoid carcinoma: A case report

Version: 0 Date: 28 Jul 2019

Reviewer: Paola Ciriaco

Reviewer's report:

Dear Authors, this is an interesting case but it lacks of important information’s. I understand that the patient underwent total body CT scan preoperatively, did the total body included brain CT scan? If yes, was the right maxilla soft tissue mass detected at the CT scan? I wonder if PET scan is routinely performed in lung cancer patients at your Department, maybe PET scan would have had detected the metastasis preoperatively.

An extensive English review of the paper is needed.

Level of interest
Please indicate how interesting you found the manuscript:

An article of limited interest

Quality of written English
Please indicate the quality of language in the manuscript:

Not suitable for publication unless extensively edited

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?
6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.
