Reviewer’s report

Title: Subpleural multilevel intercostal continuous analgesia after thoracoscopic pulmonary resection: a pilot study

Version: 0 Date: 03 Aug 2019

Reviewer: Clauden Louis

Reviewer's report:

Study describes a novel parenteral administration of continuous narcotic therapeutic analgesics without the risk and complications seen in that of epidural administrated therapeutics. This study did not prove an non-inferiority but is able to discuss feasibility within an area without universal consensus. More studies will be required to understand this modality more. Great study.
