Reviewer’s report

Title: The Risk Factors for Postoperative Cerebral Complications in Patients with Stanford Type A Aortic Dissection

Version: 0 Date: 09 Aug 2019

Reviewer: Toshihiro Fukui

Reviewer's report:

The authors evaluated the risk factors of postoperative cerebral complications in patients undergoing operation for type A aortic dissection. The manuscript is well-written. However, the number of postoperative cerebral complications is few. Moreover, I think it seems strange to include various cerebral complications because each of them has different cause and mechanism.
