Reviewer’s report

Title: Excessive intravenous crystalloid infusion after video-assisted thoracoscopic surgery lobectomy is associated with postoperative pneumonia

Version: 0 Date: 01 Jun 2019

Reviewer: D Galetta

Reviewer's report:

In this manuscript the Authors tried to identify the risk factors for post-operative pneumonia in patients undergoing VATS lobectomy.
They performed a retrospective analysis of a large cohort of patients operated on during one year.

This manuscript should be considered as a redundant one.
The Authors have recently published a similar paper:

Risk factors of postoperative pulmonary complications after minimally invasive anatomic resection for lung cancer.
