Title: A summary of second systemic pulmonary shunt for congenital heart disease with pulmonary hypoxemia

Version: 0 Date: 17 Jan 2020

Reviewer's report:

I appreciate the opportunity to review this work. Briefly, the authors are describing their own experiences and learning experiences in patients undergoing systemic to pulmonary shunt operations. I'm afraid that their dissertation is very basic and at times inaccurate. This work does not add anything to the field of congenital heart surgery and therefore of very minimal interest.
