Reviewer’s report

Title: Gli promotes tumor progression through regulating epithelial-mesenchymal transition in non–small-cell lung cancer

Version: 0 Date: 05 Nov 2019

Reviewer: Cong Li

Reviewer's report:

This manuscript provides additional insights into the role of SHH/Gli signaling pathway in non-small-cell lung cancer. Overall, the paper addresses well and conclusions are justified. The experiments are well designed and presented. The manuscript could improve with additional results.

Comments

In Figure 5B, I believe the legend of Y axis is not percent of wound. Maybe that is fold change compared with 0h.

In Figure 6 and 7, it should indicate magnification and areas where the authors used to count invaded cells.

Level of interest
Please indicate how interesting you found the manuscript:

An exceptional article
