Reviewer’s report

Title: A modified axillo-femoral perfusion for acute type A aortic dissection accompanied with lower limb malperfusion

Version: 0 Date: 27 Oct 2019

Reviewer: Roman Gottardi

Reviewer's report:

The authors have to be congratulated to an impressive number of patients treated for a rare complication of an acute Type A Dissection. The manuscript is well written and the message clear. There is just one minor comment I have for the authors. I would add to the discussion also the some thoughts on the protective effects of hypothermia that can be achieved as the leg is already reperfused during cooling.
