Reviewer’s report

Title: Preoperative uric acid predicts in-hospital death in patients with acute type A aortic dissection

Version: 0 Date: 28 Oct 2019

Reviewer: P Zhu

Reviewer's report:

Thanks you very much for give me a chance to review this paper, and i have some question about your article

1. After analysis all data, you regard serum UA was an independent predictor for type a aortic dissection. The serum UA and Creatinine /BUN / were associated with kidney function, the survival group and no-group were different in several factor include UA /Creatine /BUN/D-dimer/Fibrinogen/plaelet and so on. the procedure and clamp time is different between two group. so i just regard no UA is predictor factor. the kidney function or the patient with low perfusion syndrome was the independent predictor, so what do you opinion?
