Reviewer’s report

Title: Combined One-Stage Minimally Invasive Surgery for Primary Pulmonary Carcinoma and Mitral Regurgitation

Version: 0 Date: 16 Nov 2019

Reviewer: Henrique Murad

Reviewer's report:

This is an interesting way of combined treatment of mitral insufficiency and right upper lobe adenocarcinoma. I have a few remarks that must be corrected: 1- there is no mention on why to correct the mitral insufficiency as there is no data about functional class or ventricular size; 2- there is no mention on staging of the lung cancer; 3- the case description is confusing and should be improved; 4- the discussion is very poor as there is no comparison with literature data; no discussion on why to do mitral first and lobectomy second, and not the other way around. 5- the references are too short
