Reviewer's report

Title: The Role of the Fractional Flow Reserve in the Coronary Steal Phenomenon Evaluation Caused by the Coronary-Pulmonary Fistulas: Case Report and Review of the Literature

Version: 0 Date: 29 Nov 2019

Reviewer: Fumiaki Shikata

Reviewer's report:

This article is a case report who had FFR measurement of coronary fistula.

FFR measurement may be one of options to measure steal phenomenon but important thing to treat CAF is to rescue myocardial ischemia. Should not focus only on FFR.

Level of interest
Please indicate how interesting you found the manuscript:

An article whose findings are important to those with closely related research interests

Quality of written English
Please indicate the quality of language in the manuscript:

Not suitable for publication unless extensively edited

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?
If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.

I declare that I have no competing interests'
