Reviewer’s report

Title: THORACOSCOPIC SURGERY APPROACH TO MEDIASTINAL MATURE TERATOMAS: A SINGLE-CENTER EXPERIENCE

Version: 0 Date: 02 Nov 2019

Reviewer: Charilaos Panagiotis Koutsogiannidis

Reviewer's report:

The authors reported an interesting case series of surgical management of mediastinal teratomas thoracoscopically. I congratulate them for their operations and overall patients' management. The above case series might be of interest to readers because of their rarity. Although, I have a few concerns that the authors have to deal with.

Their text is not well written. It has a few syntax errors. It would be preferable the text to be reviewed by a native English speaker.

Also, I would appreciate if the authors could describe the differences between the two thoracoscopic techniques (closed and video-assisted). Generally, my opinion about this case report is positive.
