Reviewer’s report

Title: Is lobe specific lymph node dissection adequate for cN0-1 non-small cell lung cancer?

Version: 0 Date: 04 Dec 2019

Reviewer: Paolo Scanagatta

Reviewer's report:

JCTS-D-19-00248 Is lobe specific lymph node dissection adequate for cN0-1 non-small cell lung cancer? Although this is a retrospective study, with an inevitable selection-bias, the analysis is interesting and it suggests that non-lobe-specific lymphnodal metastases could be not identified performing a specific lymph node dissection. This paper could be a start point for further studies.
