Reviewer's report

Title: The impact of workforce redesign policies on role boundaries in generalist podiatry practice: Expert member views within the professional body

Version: 1
Date: 22 September 2014

Reviewer: Anita Williams

Reviewer's report:

The information contained in the paper is of value to the profession and is worthy of publication. However, the structure and flow of the paper requires very detailed attention. In particular the links between paragraphs are almost non-existent and there is no clear flow from paragraph to paragraph. The key messages are therefore lost both in the background and discussion. The references need attention as does the positioning of the aim of the study ie at the end of the Background. The information in the abstract needs to clearly reflect the main body of the paper.

I would be really happy to review an amended version

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: No, the manuscript does not need to be seen by a statistician.
