Reviewer’s report

Title: Reliability of isometric subtalar pronator and supinator strength testing

Version: 3
Date: 28 November 2014

Reviewer: Adam R Bird

Reviewer’s report:

Thankyou for resubmitting this paper, and making the individual comments regarding the suggested changes.

Minor essential revisions: The paper reads well, but there are still a number of typographical errors in the first half of the paper - eg. line 80 'prior the', line 104 double full stop, line 126 'activitiy' and 'peronaeus', line 188 extra comma.

I like the style of writing for the methods and results parts of the paper - these are well presented, and link back to the literature well.

The extra picture of the equipment setup helps understanding with the content - thank you.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
