Reviewer’s report

Title: Pedobarography as a clinical tool in the management of diabetic feet in New Zealand: a feasibility study

Version: 1 Date: 31 May 2017

Reviewer: Peter Lazzarini

Reviewer's report:

Thank you for the opportunity to re-review this paper. I congratulate and thank the authors for their comprehensive explanation and changes to address my comments in the original review it is very much appreciated. I believe the authors have now satisfactorily addressed all my comments and concerns. I would still have preferred to have seen a summary table of aggregated baseline participant characteristics, however, the authors do still report all characteristics in the large case-series like Table 1. So I will leave this at the discretion of the authors and editors. Otherwise congratulations again to the authors and I look forward to seeing (and citing) this paper published soon.
