Title: Increase in body weight over a two-year period is associated with an increase in midfoot pressure and foot pain

Version: 1 Date: 01 Jul 2017

Reviewer's report:

Dear Authors

Thank you for your response to the review comments. I think the changes in the article have provided clarity in the results and discussion. I also think the article now has greater clinical significance as weight gain is as important as weight loss in understanding the prognosis of foot pain.
