Reviewer’s report

Title: The effects on calcaneofibular ligament function of differences in the angle of the calcaneofibular ligament with respect to the long axis of the fibula: A simulation study

Version: 1 Date: 28 Nov 2017

Reviewer: Helen Branthwaite

Reviewer's report:

The response to comments are justified and enhance the reading of this paper. It is an interesting study and adds to the knowledge on human variation. It would be fascinating to develop this work into identifying orientation in clinic and referring to pathology or function.

Level of interest
Please indicate how interesting you found the manuscript:

An article whose findings are important to those with closely related research interests

Quality of written English
Please indicate the quality of language in the manuscript:
