Reviewer's report

Title: "I need somebody who knows about feet" a qualitative study investigating the lived experiences of conservative treatment for patients with Posterior Tibial Tendon Dysfunction.

Version: 1 Date: 13 Aug 2019

Reviewer: Ryan Causby

Reviewer's report:

Thank you for the chance to review your revised manuscript. There has been a substantial effort to address the concerns and suggestions raised by the reviewers. I feel the paper has been greatly improved as a result of these changes. The issue around the purposive sampling and small sample size still exists, but I feel that there is greater transparency regarding this process and the limitations that this brings to the generalisability of the findings.

There are still a few minor grammatical issues which need to be addressed:

Page 3, Line 56 - PTTD has not yet been defined. may be best to avoid abbreviation
Page 7, Line 145 - gap missing after full-stop
Page 11, Line 235 - Either Researcher's or Researchers' depending on your meaning
Page 12, Line 249 - Remove 'is'
Page 19, Line 386 - "...in rehabilitation, "

Also, page 11 line 227 - The level of experience should be quantified (i.e. over 10 years experience).

Furthermore, in-line with qualitative methodology, and the experiences of the interviewer impacting on interpretation, a small amount more of detail would be good. I.e. has the interviewer worked in solo practice, in an interprofessional environment, public or private.

Thank you,

Level of interest
Please indicate how interesting you found the manuscript:
An article whose findings are important to those with closely related research interests
