Reviewer's report

Title: Spray on skin for diabetic foot ulcers: an open label randomised controlled trial

Version: 0 Date: 03 Sep 2019

Reviewer: Matthew Malone

Reviewer's report:

The protocol for the open label study for an intervention in DFUs is generally of a good standard. It is well written but I do have a few minor suggestions which may help improve the protocol for readership and also for your own thoughts on the study design. The majority of these have been outlined as annotated comments directly in the PDF. I do have one major question which was not defined in the protocol. Will this intervention be used in infected DFUs or DFUs with no clinical infection. This is not clear.

Level of interest
Please indicate how interesting you found the manuscript:

An article whose findings are important to those with closely related research interests

Quality of written English
