Reviewer’s report

Title: Development of a national survey on foot involvement among people with psoriatic arthritis in Australia using a best practice approach: A survey development protocol

Version: 0 Date: 09 Jul 2020

Reviewer: Emma E Cowley

Reviewer's report:

This piece of work is much-needed and, in my opinion, of a very high quality. There are minor spelling errors to be corrected (convenience not convenient on P5 and contrast not contract on P14) but overall it read very well, was logically structured and addressed the title. My only recommendation would be to suggest which of the processes was most impactful in achieving the return of data for survey designs with less resource to undertake the full process might use instead.

Publons Reviewer Recognition. Springer Nature can send verification of this review directly to Publons (a subsidiary of Clarivate Analytics). If you would like to take advantage of this service, please click on the “Yes” option below. Your name, email address, title of the reviewed manuscript, name of the journal, and date of your review submission (the “Review Data”) will then be transmitted to Publons upon publication of the manuscript. If you have already registered at Publons, they will notify you of the receipt of this review and update your profile as per your settings and their policy. If you are not registered with Publons, you will receive an email from them asking you to register in order for them to be able to recognize your review on your new profile page. Publons may use the Review Data to generate derivative metadata for the benefit of Publons and you as a reviewer, carefully considering the sensitivity of such information. For example, Publons may verify your record as a reviewer by updating your profile published on its webservice if you have registered for such service or help editors to identify candidate reviewers. Please find the details of processing in Publons’ privacy policy https://publons.com/about/terms

Yes

Level of interest
Please indicate how interesting you found the manuscript:

An article of importance in its field
