Title: Non-Invasive assessment of vibration perception and protective sensation in people with Diabetes Mellitus: Inter- and Intra-rater reliability

Version: 0 Date: 16 Dec 2019

Reviewer: Debbie Sharman

Reviewer's report:

Many thanks for submitting your paper describing your worthy research project.

This is a nice little study providing some valuable information pertaining to current practice.

I have little to recommend in the way of amendments, although I do think it would be helpful for some readers to clarify / define what is meant by inter- and intra-reliability as not all readers will be able to readily distinguish between the terms.

You have highlighted the low numbers in your limitations, but have you any plans to try and repeat with more participants?

I have noticed that some of your references are quite old. Only 7 of your 38 references are less than 10 years old. Perhaps this is worthy of a comment within your discussion - perhaps confirming the paucity of data around this topic?
