Reviewer’s report

Title: Symptomatic pes planus in children: a synthesis of allied health professional practices.

Version: 1 Date: 14 Jan 2020

Reviewer: Matthew Hill

Reviewer's report:

The reviewer appreciates the authors changes to the original manuscript with the addition of the supplementary material and I would be happy to recommend this paper for publication.

One minor comment in relation to line 125-126 "The coding, categorisation and synthesis of the data was undertaken by one author (MT)" was this process subject to any verification or calibration such as structured discussion (supervisory meetings) between the other authors and MT to mitigate any personal bias affecting this process. It may benefit the publication if this was alluded to here.
