Reviewer’s report

Title: The genetic basis of colonic adenomatous polyposis syndromes

Version: 0 Date: 30 May 2016

Reviewer: Luigi Ricciardiello

Reviewer's report:

This is a well-written overview on Familial Adenomatous Polyposis which summarizes the genetic predispositions and the clinical scenarios related to the different types and subtypes of the disease.

For the clarity of the reader I would reorganize the chapters as: FAP1, FAP2, FAP3, Genotype-Phenotype and a separate chapter on Modifier Alleles.

Also a summarizing table describing each FAP (1, 2, 3) with the specific features would greatly improve the manuscript.
