Reviewer’s report

Title: Validation of a digital identification tool for individuals at risk for hereditary cancer syndromes

Version: 1 Date: 13 Sep 2018

Reviewer: Florentia Fostira

Reviewer's report:

The authors have satisfactorily responded to most of my questions and made the necessary changes to the manuscript.

However, I only have a minor comment. In respects to my third comment, I think that the authors misunderstood what was asked. My suggestion was to make a comment on PREMM just because it stands out. I am familiar with the bibliography that the authors state, but I think that the sentence they wrote on their response letter "the PREMM models provide….. " can be added to state the difference between PREMM and their tool. That would be sufficient.
