Title: Colorectal carcinoma in the course of inflammatory bowel diseases

Version: 0 Date: 31 May 2019

Reviewer: Muhammad Rashid

Reviewer’s report:

The review article "Colorectal carcinoma in the course of inflammatory bowel diseases" by Hnatyszyn and colleagues describe the link of inflammatory bowel diseases with risk of colorectal cancer. This is a revised manuscript. Authors have addressed all points regarding the first submitted manuscript. The revised manuscript is now in a much improved and acceptable form.

Following are the minor comments:

* The authors should use the abbreviations, throughout the manuscript, for terms first described in full e. g CRC should be written instead of "colorectal cancer" in all place except where it first appeared. Same rule should be applied for ulcerative colitis (UC), Crohn's disease (CD), and familial adenomatous polyposis (FAP).

Currently this rule is not practiced appropriately.
