Reviewer’s report

Title: A family pedigree of malignancies associated with BRCA1 pathogenic variants: A reflection of the state of art in China

Version: 2 Date: 08 Jul 2019

Reviewer: Magdalena Ratajska

Reviewer's report:

Authors introduced most of the reviewers' comments, and the actual version of the manuscript is far better written.

However, there are some minor points, e.g.,

1) In the sentence on page 3 (line 49-52) the phrase "should accept" should be replaced with "should be offered".

2) The deletion of exon 8 BRCA1 have to be denoted according to nomenclature (http://varnomen.hgvs.org/)

Nevertheless, my primary concern remains actual -the analysis of asymptomatic child is against general recommendations. And I am not fully- convinced with authors explanation. Did the author ask for the interpretation/permission local Review Board?

Level of interest
Please indicate how interesting you found the manuscript:

An article whose findings are important to those with closely related research interests

Quality of written English
Please indicate the quality of language in the manuscript:
