Reviewer’s report

Title: Recommended care and care adherence following a diagnosis of Lynch syndrome: A mixed-methods study

Version: 0 Date: 12 Sep 2019

Reviewer: Mohammad Akbari

Reviewer's report:

This is a descriptive study about different aspects of Lynch syndrome diagnosis and the utilization of the screening recommendation for cancer surveillance for a specific community. Although the number of patients with LS was very small in this study, the results might be of interest to the readers of this journal.

It would be of interest if the authors can provide more details on the genetic mutations of the patients, in particular the large rearrangements if there is any among their patients.

Level of interest

Please indicate how interesting you found the manuscript:

An article whose findings are important to those with closely related research interests

Quality of written English

Please indicate the quality of language in the manuscript:
