Reviewer’s report

Title: Ubiquitous Neurocognitive Dysfunction in Familial Adenomatous Polyposis: Proof-of-Concept of the role of APC Protein in Neurocognitive Function.

Version: 0 Date: 11 Dec 2019

Reviewer: Allan Spigelman

Reviewer's report:

Genotype-phenotype correlation is overcalled in a study with such small numbers. Nor is this correlation exceptionally strong elsewhere in FAP. While there are correlations there are also significant exceptions.

Also overcalled is the conclusion that other germline hereditary cancer syndromes should be subject to similar study when the premise of this work revolves around the APC gene.
