Reviewer's report

Title: Efficacy and Safety of Ban-Lan-Gen Granules in the Treatment of Seasonal Influenza: Study Protocol of A Randomized, Double-Blinded, Oseltamivir- and Placebo-Controlled Clinical Study

Version: 1 Date: 22 January 2015

Reviewer: ZX Bian

Reviewer's report:

I have read through the manuscript and found that the study is interesting, but some issues should be clarified, including:

1. Quality control of BLG,
2. Content of placebo
3. Interventions in each group are not clear.
4. Follow up the format of SPIRIT.
5. Dosage setting of BLG.
6. Responsibility of each participant.
